COLD STORAGE REPORT
AS OF FEBRUARY 1, 1943

Reports to the U. S. Department of Agriculture on perishable food items held in cold storage warehouses and meat packing plants on February 1, 1943, showed quite significant reductions from a month earlier for all commodities with the exception of frozen and cured pork and lard. There were only four items which indicated heavier stocks than were on hand a year earlier. These were fresh apples and pears, frozen fruits and frozen vegetables. Apple stocks were 8.4 million bushels heavier than a year ago, frozen fruits 14.2 million pounds greater and frozen vegetables 7.7 million pounds heavier. Creamery butter stocks were the lowest for February 1 since 1924, and were 67.5 million pounds less than the February 1, 1942 holdings. Cheese stocks were 51.2 million pounds below those of a year ago. Shell and frozen egg stocks were the equivalent of 565,000 cases below February 1, 1942, frozen poultry 64 million pounds below, frozen and cured beef 36 million pounds less, pork 22.3 million less and lard and rendered pork fat 97.4 million less.

Stocks of frozen and cured beef were reduced during January by 20.5 million pounds while pork stocks increased by 100.9 million and lard and rendered pork fat by 20.7 million pounds. The total net reduction in freezer holdings is reflected in the occupancy figures reported for February 1, which indicated that freezer space was occupied to 69 percent of capacity compared with 75 percent a month earlier. Cooler space showed minor change from January 1, occupancy being 59 percent compared with 60 percent.

Contents of February 1, 1943, Cold Storage Report

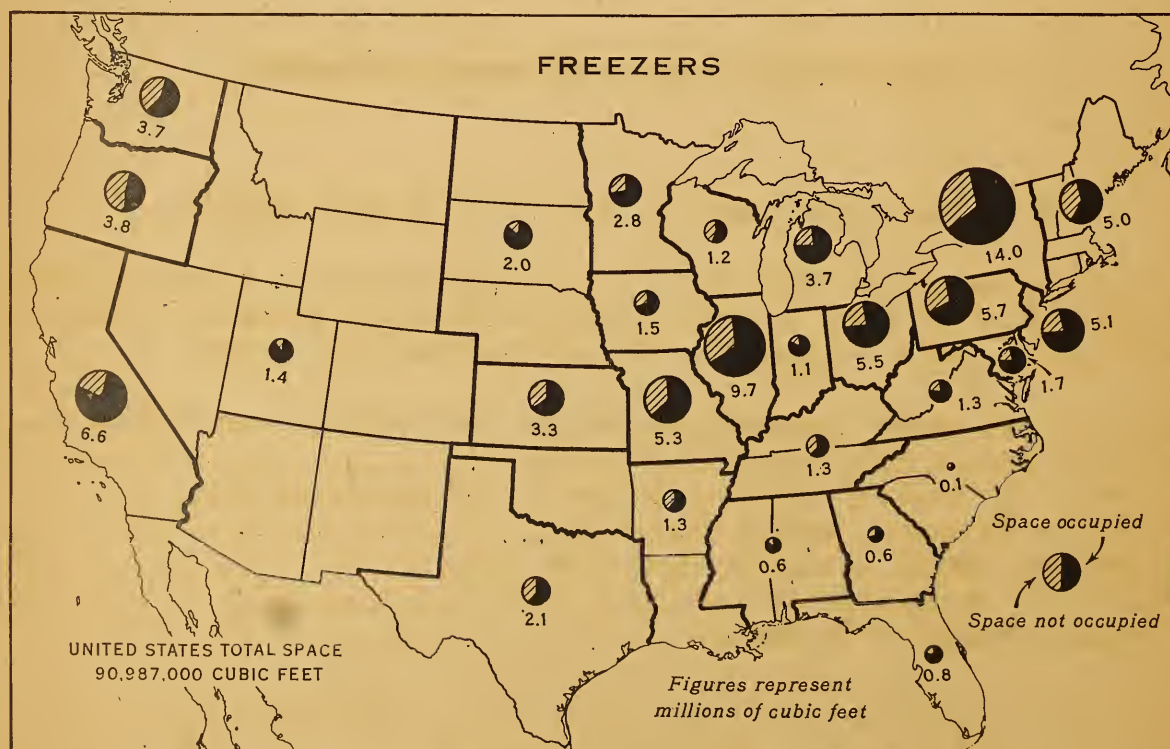

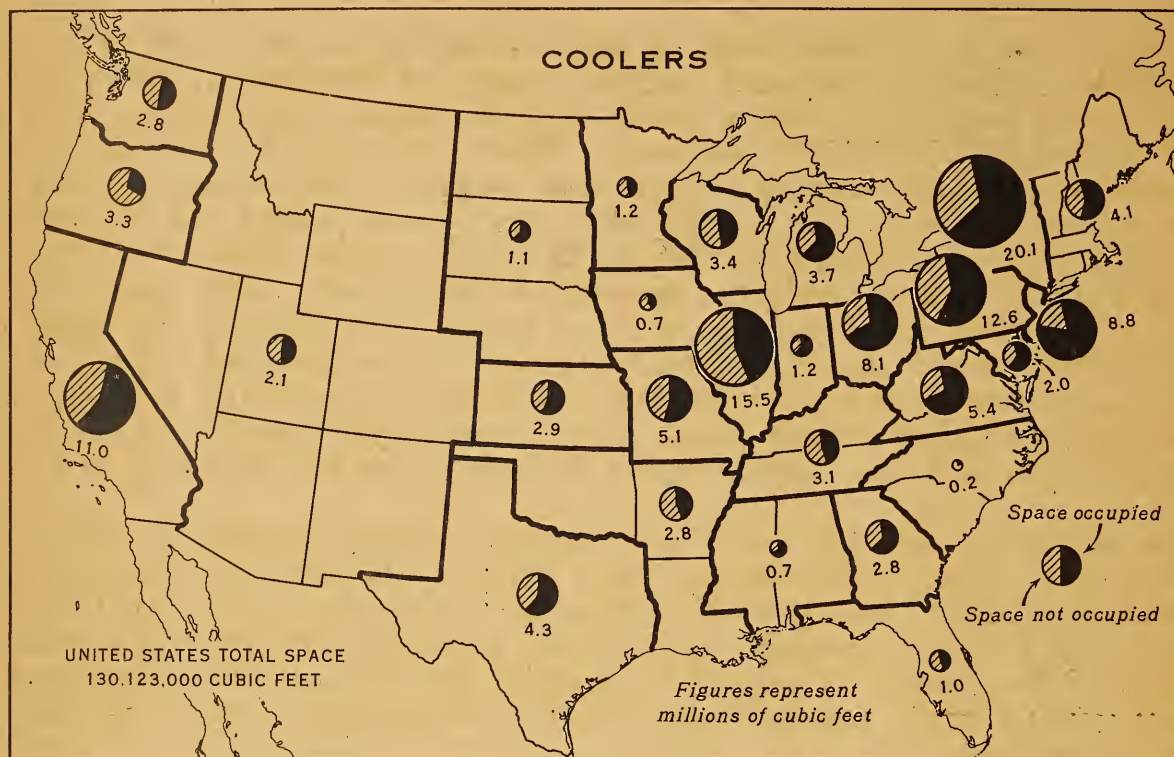

Separate tables appearing in this report represent holdings of the following groups of commodities on hand in cold storage warehouses and meat packing plants on February 1, 1943, with comparisons for previous related dates:

1/ Reported to the Department of Agriculture as of June 16, 1941

2/ Percentages for the periods covered here were made as comparable as possible.

3/ Preliminary.

4/ Revised.

5/ Weighted average of the occupancy for geographic divisions using the corresponding net piling space as weights.

FRUITS AND VEGETABLES

There were 23,569,000 bushels of apples reported in cold storage warehouses on February 1, 1943. This indicates withdrawals of 7,008,000 bushels during January. This was an unusually heavy out-movement for the period comparing with 5,616,000 bushels for the same period a year earlier and 5,672,000 for the 5 year 1938-42 average.

Frozen fruit stocks were 172,130,000 pounds or 14,157,000 pounds heavier than February 1, 1942, and 44,333,000 above average. Frozen vegetable stocks totaled 90,346,000 pounds which quantity exceeds those of a year earlier by 7,708,000 pounds.

(See table on page 8 for February 1, 1943, holdings by geographic divisions)

DAIRY AND POULTRY PRODUCTS

Creamery butter stocks on hand February 1, 1943 were down to 15,600,000 pounds. This quantity is 67,506,000 pounds below holdings on February 1, 1942 and 41,515,000 pounds below the 5-year average (1938-42) for February 1. The above figures represent the lowest February 1 stocks since 1924 when they were down to 15,246,000 pounds.

Cheese holdings totaling 113,815,000 pounds were 51,234,000 pounds less than those of a year earlier, but only 3,197,000 pounds below average.

Holdings of eggs were 205,000 cases of shell and 59,828,000 pounds of frozen or a total case equivalent of 1,800,000. A year ago there were 2,365,000 cases of both shell and frozen on hand and the average holdings are 1,999,000 cases. Reports from egg driers indicate a back-log against future commitments of dried eggs of 287,000 cases of shell and 1,516,000 pounds of frozen. Quite a sizable quantity (probably about 110,000 cases) of the shell eggs for back-log are held in the private coolers of driers and are not included in the storage stocks of 205,000 cases shown below.

Poultry stocks were reduced during January by 45,815,000 pounds. The 142,128,000 pounds on hand on February 1, 1943 were 63,992,000 pounds below stocks of a year earlier and 20,497,000 pounds below the 5-year average.

(See table on page 9 for February 1, 1943, holdings by geographic divisions)

* Stocks owned by FDA and FSCC included in total figures.

1/ Frozen eggs are converted on the basis of 37.5 pounds to the case.

2/ SPECIAL NOTE: 81 percent of total frozen eggs reported as of February 1, 1943 were classified as follows: Whites 33 percent; Yolks 19 percent; and mixed 48 percent.

MEATS AND LARD

Total frozen and cured meat stocks were increased during January by a net of 65.4 million pounds. February 1, 1943 holdings totaling 803.5 million pounds were 84.2 million pounds below those of February 1, 1942 and 9.3 million above the 5-year average (1938-42) for February 1.

Frozen and cured beef stocks were 106.5 million pounds indicating net withdrawals during the month of 20.5 million. Stocks on hand this period were 36.1 million pounds less than a year ago but 18.1 million above average. Pork stocks were increased during January by 100.9 million pounds. February 1 stocks were 591.4 million or 22.3 million pounds below those of a year earlier and 13.1 million pounds below average. Lamb and mutton stocks were reduced during the month by 10.1 million pounds, and trimmings and offal were reduced by 4.8 million pounds. Lard and rendered pork fat holdings increased by 20.7 million pounds during January. There were 112.1 million pounds reported on hand on February 1, 1943. This quantity is 97.4 million pounds below the February 1, 1942 stocks and 77.9 million pounds below the 5-year (1938-42) average.
